

CONSENT FORM

We are a team of 16 undergraduates from IISER Thiruvananthapuram, participating in the International Genetically Engineered machine (iGEM) , an annual international competition. Teams around the world come up with solutions to tackle real world problems. This year we are working on developing a novel drug delivery system for breast cancer.

I understand and confirm that the actual video recording of this interview can be used by the team and it would be published and available in online platforms.

I confirm that my participation in this research project is voluntary.
I have read and understood the explanation provided to me.
